

Eioz Energy

Illuminating Lives!

www.eiozenergy.com

OUR STORY

Eioz Energy are the pioneers in lighting solutions based out of Middle East. Specialising in simple, elegant and industrial themes in the world of lighting solutions, our predominant focus remains to provide value for money to clients worldwide in both residential and commercial domains.

Established in 2010, we have come a long way with our comprehensive designs that suit our customers' needs. We have illuminated thousands of lives with our vast portfolio. Recommended by the Association of Turkish Lighting Equipment Manufacturer Association (AGID), our manufacturers are based out of Europe, USA, Turkey, South Asian countries like India and China and all around the globe. Where do we see ourselves in a couple of years? Only one word - sustainable. Our Design and procuring teams spread across seventy geographies are hellbent on. Reducing carbon footprint and incorporating green energy in our Lighting designs.

MISSION

We deliver the promises we make. Established in 2010, we have come a long way in determining comprehensive designs that suit the customer's needs. We have touched Hundreds and thousands of lives with our vast portfolio. In the next decade, we see ourselves proving that the world is our oyster. Green energy, optimizing the use of energy with smart solutions and sustainability are just a few of the many ideas that we are working on.

VISION

We deliver the promises we make. Established in 2010, we have come a long way in determining comprehensive designs that suit the customer's needs. We have touched Hundreds and thousands of lives with our vast portfolio. In the next decade, we see ourselves proving that the world is our oyster. Green energy, optimizing the use of energy with smart solutions and sustainability are just a few of the many ideas that we are working on.

We believe in the three Values.

Integrity for firm believers in actions that trigger mutual trust

Innovation powered with information

Intelligence to sail through the toughest of times.

Our Work Process.

Design
Procuring
Supply
Commission

● **Design & Engineering**

Designing lighting with well-planned and quality methods combined with creative design and energy-efficient architecture to match the needs of the end-users.

● **Procurement**

Our manufacturing units are beautifully engineered with smart power distribution specifications to make them functional. We love to work on the impossible to make it possible in an excellent structure.

● **Supply**

Insight supplies all types of indoor & outdoor light fittings like street lights, poles, camera poles, high masts, obstruction lights, and explosion proof lights — through our preferred manufacturers and reliable wholesale suppliers. With the highest standards and quality products from certified manufacturing companies combined with our experienced team, we are the go-to provider for lighting solutions tailored to meet customer requirements.

● **Testing & Commissioning**

The testing & commissioning process is applied to the lighting solutions to implement the correct practices that comply with the project requirements and evaluates the overall functioning and characteristics of the lighting products.
